

5 star service ****

You made it easy

THANKS!!!!!!

So glad I found you!

Are you free this week?

I made a booking for Wednesday, see you then!

Will recommend.

Perfect!!!

I help small businesses improve their online presence with affordable retainer packages.

After 40 years working creatively across advertising, media, marketing companies including the Head of Marketing for well known large businesses, I've decided to start working independantly with small and medium businesses that need professional support without having to pay agency prices or deal with layers of account managers that charge by the hour. I'm also using A.I. to deliver faster turnaround, better value and better work.

Most small businesses don't need a large marketing agency. They need someone experienced, reliable and easy to deal with who can keep them looking professional online. That's where I come in. I work one-on-one with local businesses to manage and improve their online presence with practical, affordable monthly support.

Retainer based creative support that keeps your business looking professional online. Services include

- Social media management
- Content creation and copywriting
- Graphic Design
- SEO improvements
- AI-assisted content production
- Direct support from one experienced operator

No lock-in contracts. Just consistent, professional work backed by decades of real-world experience.

Social Media and Graphic Design

I create and manage professional social media content designed to help your business stay visible, attract attention and build trust with customers online. Content is tailored specifically for LinkedIn, Facebook and Instagram, including promotional posts, graphics, captions, reels and short-form video designed to suit each platform and audience. With access provided, I can also handle the posting and day-to-day management for you, keeping your pages active and consistent without adding extra work to your schedule.
